PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years building scalable Angular and React applications across fintech and healthtech. Led a legacy-to-modern migration serving 300K+ users, co-built an org-wide design system that halved feature delivery time, and mentored 5+ engineers. Focused on performance, testing discipline, and shipping reliably in high-traffic production environments.

SKILLS

Languages: TypeScript, JavaScript, HTML, CSS/SCSS

Frameworks & Libraries: Angular (2–19), React, AngularJS, RxJS, NgRx, Tailwind CSS

Architecture & APIs: Micro Frontends (Module Federation), GraphQL, REST, WebSockets

Tooling & Testing: Playwright, Unit Testing, Webpack, Storybook, StencilJS, ESLint, Git, Chrome DevTools

Other: OpenAI API, GitHub Copilot, Web Accessibility (a11y)

WORK EXPERIENCE

Senior Software Engineer

SS&C Technologies

Aug 2025 – Present
Hyderabad, India (Hybrid)

- Build and ship features for enterprise Angular applications powering complex investment simulation workflows, using TypeScript, GraphQL, and RxJS.
- Hardened authentication flows and optimized simulation logic, improving reliability and maintainability of core financial workflows.
- Established Playwright end-to-end coverage across critical user flows, catching 15–20 regressions per release cycle before they reached production.

Software Engineer

Shiprocket Limited

Sep 2023 – Jun 2025
Gurugram, India (On-site)

- Led the migration of 30+ high-traffic modules serving 300K+ active sellers from AngularJS to Angular 19 — auditing legacy code for functional gaps and running multi-role testing to deliver a zero-disruption rollout in live production.
- Engineered a ChatGPT-style courier rule engine on the OpenAI API, automating 20+ operations tasks; built global search with deep linking and keyboard shortcuts, boosting ops efficiency by 30%.
- Co-built the Shiprocket UI Design System (StencilJS + Storybook, atomic design), cutting UI bugs by 35% and halving feature delivery time across teams.
- Mentored 5+ engineers in modern Angular and enforced linting standards; integrated Copilot-assisted workflows into the team's development process.

Software Engineer

Biofourmis India Pvt. Ltd.

Apr 2022 – Jul 2023
Bangalore, India (Hybrid)

- Spearheaded micro-frontend adoption with Module Federation, removing shared deployment blockers and enabling independent team-wise releases.
- Architected multi-region deployment support with dynamic API routing and failover, improving availability for a global patient-monitoring platform.
- Integrated real-time collaboration tooling (Twilio Video, Countly, NGXS WebSockets) to enable 24/7 patient monitoring and synchronous care-team interactions.

Software Engineer (Intern → Full-time)

Novopay Solutions Pvt. Ltd.

Jul 2020 – Apr 2022
Bangalore, India (Remote)

- Built Aadhaar-enabled banking modules (eKYC, cash withdrawal, balance inquiry) used by 100K+ retail agents providing secure financial access in rural areas.
- Designed a QR-code wallet flow that reduced transaction failures and increased merchant adoption.
- Integrated CleverTap, Freshdesk, and chatbot support, cutting average support resolution time by 40%.

EDUCATION

B.Tech, Computer Science and Engineering — National Institute of Technology, Warangal

2016 – 2020

AWARDS

- 2nd Place, Shiprocket Codefest (2024) — designed a PII Dashboard for secure user-data management.
- Bravo Award, Biofourmis (Q3 2023) — for enabling the multi-region architecture.
